\*\*Each year the National statistics as published by the National newspapers (Irish Times & Irish Independent) compile data about Higher Education attendance from various schools. This data is not merely compiled of students who sat the Leaving Certificate in 2017 but also students who may have deferred college placement, re-applied for another course or transferred from a PLC course having been part of a Leaving Certificate class in previous years. In other words, some data rolls over to the subsequent year.

The data above includes actual and projected destinations from Leaving Certificate cohort 2017 but does not include data in respect of LC students from previous years.
